NOTICE

ROAD WORK Speed Table Installation

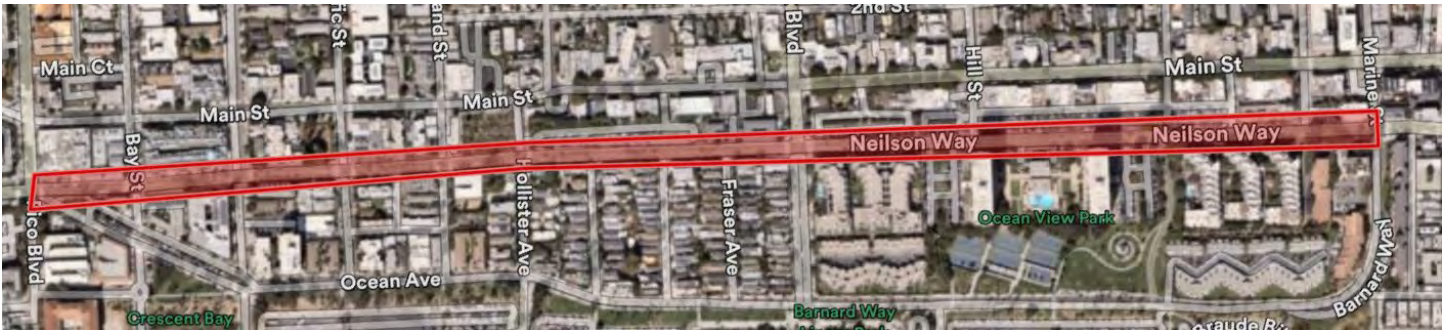

Date(s): Tuesday, October 20, 2026, through Friday, October 30, 2026

Work Hours: 8:00AM – 5:00PM

Location: Nielson Way between Pico Boulevard and Marine Street

Dear Neighbor:

The City of Santa Monica has contracted with Excel Paving to install speed tables on Nielson Way between Pico Boulevard and Marine Street. Nielson Way will have limited access during construction and parking around the work areas will not be permitted. In addition, corresponding signs and roadway markings will also be upgraded.

Construction Period: Construction on Nielson Way will begin on *Tuesday, October 20*, with grinding operations. Then the new asphalt speed hump paving will take place. The operation of heavy equipment necessary to construct this project will create intermittent loud noise. Please note that the start and completion time/date of construction may be delayed due to unforeseen conditions and weather.

Traffic Impacts: Nielson Way between Pico Boulevard and Marine Street will have limited access and *daily closures of roadway segments* during construction. Please follow traffic control personnel's direction as well as all temporary construction detour signs. It is recommended to plan an alternate route, if possible. Access to driveways will remain open during the project unless work takes place directly in front of a driveway. On that occasion the property owner will be notified directly by the Contractor.

Parking: Parking around the work areas will not be permitted. No parking signs will be placed in areas where parking will not be allowed.

We understand this process is inconvenient and will make every effort to minimize any inconvenience that this work may cause. Please contact the Construction Manager or Inspector, at the phone numbers provided below if you have any specific concerns or questions. Thank you in advance for your patience and understanding.
